

Rod and Staff Craft Project

Supplies per child:

- 1 dark brown pipe cleaner
- 1 rust pipe cleaner

Instructions:

1. To make the staff: Fold the dark brown pipe cleaner in half, twisting the two parts into a strong stem. Shape one end like the crook of a staff.
2. To make the rod: Fold the rust pipe cleaner in thirds, twisting the three parts into a very strong stem. Bend one end over twice, forming a club head.

* Put the staff into the Shepherd's hand. He can hold the rod in the other hand or have it near by, ready for attacking predators.
